

JOB INSTRUCTION

Production Schedule: Load it, Pick the Lines, Print it

Follow the steps in order. Do one step at a time. Each step shows exactly what to click.

For	Anyone printing the Production Schedule (1st, 2nd or 3rd shift)	Prepared by	
Time	About 5 minutes	Approved by	

You will do 3 jobs, in this order

A
Load the schedule
Bring in the Excel file

B
Pick the lines
Tick the lines running today

C
Print it
Print and post the report

What you need

- A computer with JDE Sched open in the web browser.
- Today's Excel schedule file saved on that computer (it ends in **.xlsx**, **.xlsm** or **.xls**). It is usually in the **Downloads** folder.
- A printer.

3 golden rules

- 1 Check the shift first.** The top right corner must show YOUR shift. Each shift has its own schedule.
- 2 Read the pop-up before you click OK.** Clicking OK replaces the whole schedule for your shift.
- 3 Never click these two buttons.** They erase the schedule. Only a supervisor uses them.

Never click “Reset to sample data” or “Wipe all data”.

TIP: Made a mistake? Click **Undo** (top left of the app) **right away** — before you refresh or close the page. It puts things back the way they were.

A

Load the schedule from Excel

Do this once at the start of the shift, or when a new schedule comes out.

1

Check the shift in the top right corner

It must say **your** shift (1st Shift, 2nd Shift or 3rd Shift). If it is wrong, click it and pick your shift.

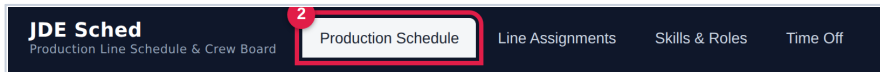

✓ **You should see:** your shift's name in the box.

2

Click the “Production Schedule” tab

It is at the top of the page, next to the app name.

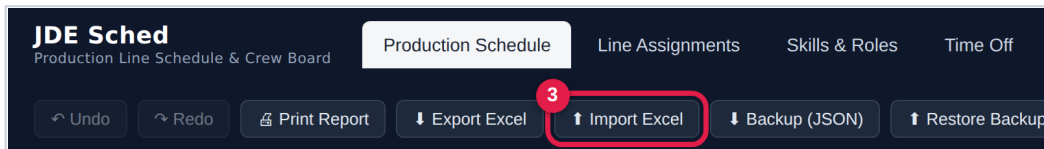

✓ **You should see:** the Production Schedule tab turns white (selected).

3

Click “Import Excel”

It is in the dark toolbar under the tabs.

✓ **You should see:** a window opens to pick a file.

4

Pick the Excel file and click “Open”

In the window: click **Downloads** on the left (or wherever the file was saved). Click the schedule file **once**, then click **Open**.

✓ **You should see:** a pop-up message at the top of the screen (next step).

5

Read the pop-up, then click “OK”

The pop-up says how many rows it found. If the number looks about right for today's schedule, click **OK**. If it looks wrong (for example 0, or far too few), click **Cancel** and check you picked the right file.

The pop-up looks like this (your number will be different):

Found **28** work order row(s). Replace the current Production Schedule?

Cancel

OK

6

Check the schedule loaded

Scroll down a little. Each production line has its own dark bar with its work orders underneath. Pick 2 or 3 work order numbers and make sure they match the Excel file.

JDE Sched
Production Line Schedule & Crew Board

Production Schedule | Line Assignments | Skills & Roles | Time Off

Shift: 1st Shift

Undo | Redo | Print Report | Export Excel | Import Excel | Backup (JSON) | Restore Backup | Reset to sample data | Wipe all data

■ Allergen (not "N")
■ Oily product
■ Bulk item A662 / A624
■ Line has a "Ready" WO
■ Line has a "PM" WO
■ Line has a "Trial" WO
 Changeover: S1 = same setup · S1 Count Change = count differs · S3 = bulk item differs · S4 = bottle size differs. % Actual Complete, Bottles Remaining and Changeover are calculated automatically.

Scheduled Lines
Check a line to highlight its whole block with a green border on the print report.

✓ **You should see:** the lines and work orders from your file (like the picture below).

CAREFUL: If a pop-up says “Could not read that spreadsheet: Could not find a production schedule table...”, you picked the wrong file, or the file is missing its **LINE** and **WO** column titles. Click OK, then try again with the right file. Still stuck? Ask your supervisor.

Pick the lines running this shift

The lines you tick get a thick green border on the printout.

1

Find the “Scheduled Lines” box

It is near the top of the Production Schedule tab, above the line bars. It lists every line from the file.

Scheduled Lines

Check a line to highlight its whole block with a green border on the print report.

☐ PKGPP ☐ PKGST ☐ VPKL01 ☐ VPKL03 ☐ VPKL05 ☐ VPKL07 ☐ VPKL08 ☐ VPKL09 ☐ VPKL10 ☐ VPKL12

✓ **You should see:** a row of line names, each with an empty tick box.

2

Tick every line that is running this shift

Click the box next to each running line so a tick appears. Leave the other lines empty. Clicked the wrong one? Click it again to remove the tick.

Scheduled Lines

Check a line to highlight its whole block with a green border on the print report.

☒ PKGPP ☒ PKGST ☐ VPKL01 ☐ VPKL03 ☐ VPKL05 ☐ VPKL07 ☐ VPKL08 ☐ VPKL09 ☐ VPKL10 ☐ VPKL12

✓ **You should see:** a tick in the box of each running line.

3

Check the green borders

Scroll down to **Print Report Preview** near the bottom of the page. This is exactly what will print.

✓ **You should see:** a thick green border around each line you ticked. Lines you did not tick still print, without a border.

TIP: Ticks are saved by themselves and show up on every computer on your shift. You do not need to tick the lines again after a new import unless the running lines changed.

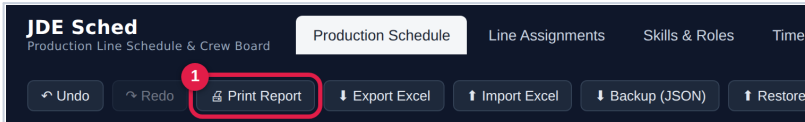

Print the schedule

Make sure Parts A and B are done first.

1

Scroll to the top and click “Print Report”

It is the first button with a printer picture in the dark toolbar.

✓ **You should see:** the print window opens, showing only the schedule.

2

Pick the printer and click “Print”

Next to **Destination**, pick your printer. Do not change the paper size or layout — the app already set them. Then click **Print**.

The print window (yours may look a little different):

Destination: **your printer**

Pages: All Layout: (leave it)

More settings > **Background graphics** ☒ (only needed if the colors are missing)

Cancel

Print

3

Check the printout and post it

Make sure it has today's date under the title, every line, and green borders on the running lines.

✓ You should see: a printout like this one.

Something went wrong?

Find your problem on the left. Do what it says on the right.

Problem	What to do
I can't find the "Import Excel" button.	Click the Production Schedule tab first (Part A, step 2).
The schedule shown is for the wrong shift.	Change the Shift box in the top right corner to your shift.
The pop-up number looks wrong.	Click Cancel . Check you picked today's file and try again.
I clicked OK on the wrong file.	Click Undo (top left) right away. If you already refreshed the page, import the right file again (Part A).
A pop-up says "Could not find a production schedule table".	Wrong file, or the file has no LINE and WO column titles. Use the right file, or ask your supervisor.
The Scheduled Lines box is missing.	The schedule is empty. Do Part A first.
No green borders on the printout.	Tick the running lines in Scheduled Lines (Part B), then print again.
The printout has no colors.	In the print window open More settings and tick Background graphics .
The schedule prints on 2 pages or is cut off.	See the next page: set Print size to Fit to one page , then print again.
Nothing happens when I click Print Report.	Refresh the page (press F5) and click Print Report again.
I clicked "Reset to sample data" or "Wipe all data".	Click Undo right away, then tell your supervisor.

Extras — only if your supervisor asks

You do not need these for a normal print.

1

Make the schedule fit on one page

Scroll down to **Customize Print Design** and click it to open it. Next to **Print size**, pick **Fit to one page**. Print again.

✓ **You should see:** the Print size box says Fit to one page.

2

Hide a column from the printout

Above the Print Report Preview, tick the name of the column you do not want printed. Untick it to bring it back.

✓ **You should see:** the column disappears from the preview.

3

Mark a line as Ready, PM or Trial

In the line's bar, find the **Line Status** box on a work order row and pick **Ready, PM** or **Trial**.

Cap Description	Allergen	Remarks	WO Qty	% Complete	Desiccant	Line Status	% Actual
	N		14334	16.07			16.1%

✓ **You should see:** the line's bar turns green (Ready), blue (PM) or purple (Trial). The printout shows the same color.

QUICK CARD — Production Schedule

Cut out or post this page at the computer

A. Load the schedule

- 1 Top right: check it says **your shift**
- 2 Click the **Production Schedule** tab
- 3 Click **Import Excel**
- 4 Pick today's file → **Open**
- 5 Read the number → **OK**

B. Pick the lines

- 1 In **Scheduled Lines**, tick every running line
- 2 Check the **green borders** in the preview

C. Print

- 1 Click **Print Report**
- 2 Pick the printer → **Print**
- 3 Check the printout and post it

STOP: Never click “Reset to sample data” or “Wipe all data”. Made a mistake? Click **Undo** right away.
